```
const CubeMesh = () => {
  const ref = useRef();
  useFrame(() => (ref.current.rotation.y += 0.01));
  return (
    <mesh ref={ref}>
      <boxBufferGeometry attach="geometry" args={[1, 1, 1]} />
      <meshNormalMaterial attach="material" />
    </mesh>
  );
};
```

```
// This is equivalent to
const material = new MeshNormalMaterial();
mesh.material = material;
```

```
const CubeMesh = () => {
  const ref = useRef();
  useFrame(() => (ref.current.rotation.y += 0.01));
  return (
    <mesh ref={ref}>
      <boxBufferGeometry attach="geometry" args={[1, 1, 1]} />
      <meshNormalMaterial attach="material" />
    </mesh>
  );
};

// This is equivalent to
const material = new MeshNormalMaterial();
mesh.material = material;
```
